Release notes v2.75.0

Key	Release Note
SMAR-8144	We have fixed an issue causing invalid RTM metrics.
SMAR-8023	Columns being rendered incorrectly has now been fixed.
SMAR-7966	We have implemented a function which allow users to end Call Monitoring.
SMAR-7963	We have fixed a bug which caused the participant dropdown to be visible through quick replies.
SMAR-7860	Populating a contact log will no longer be mandatory for a user monitoring another agent's voice call.
SMAR-7855	The Live Monitoring buttons have moved to below the dialler and we've added a permissions check for call barging.
SMAR-7598	Fix applied so that Quick Replies only appear for the channel they have been set up for.
SMAR-7400	Editing External ID inside Contact Details while not on an active contact (e.g. inside contact history) now updates the contacts attributes.
SMAR-7319	This fix now allows a user to configure a list of columns to be displayed for the RTM page as well as select a source for a column from the AWS metrics.
