# Release notes v2.76.0

| Key | Release Note |
|---|---|
| SMAR-8347 | We have now added a Feature Flag to enable us to disable the Cookie check by customer. |
| SMAR-8309 | We have fixed an issue where Queue Metrics displayed incorrectly on the Dialler, Chat and Tasks pages in SmartAgent. |
| SMAR-8301 | We have extended the Client Config and added Fixed Values for RTM v1.6 for RTM and the Personal Widgets. RTM now only shows columns with the RTM tag and the Personal Widget page now only shows columns with the PersonalWidget tag. |
| SMAR-8289 | We have fixed the Contact History page and all components will now show in the correct colours. |
| SMAR-8274 | We've added a feature whereby Automated Rules can be used to move Webform contacts. |
| SMAR-8014 | We've added instructions on how to allow third-party cookies in Google Chrome. |
| SMAR-7875 | We have created a form for adding a new Webform configuration and perform input validation. |
| SMAR-7870 | SmartAgent will now display a confirmation pop up when a user interrupts the creation of webform configuration. |
| SMAR-7815 | SmartAgent now allows users to add Webform configuration information within the user interface. |
| SMAR - 7722 | Live monitoring users can now see if the call is an inbound or outbound contact. |
